# ON-DEMAND WEBINAR

## The Clot Stops Here: Medications to Treat Alterations in Coagulation

**Joan Harris**  
RN, MSc. MHSc.

**Holly Feist**  
RN, BN, MN

**Joanne Bouma,**  
RN MN

### 2 Part Webinar Series:

#### Part A: The Basics: Physiology of Coagulation

1. Describe the physiology of clot formation and fibrinolysis.
2. Understand the role of hemostasis within the context of immune function and the stress response.
3. Discuss the disease pathologies that promote clotting.
4. Discuss the disease pathologies that promote bleeding.
5. Understand the iatrogenic causes of alterations in clotting related to the critically ill patient.

#### Part B: Thrombolytics, Anticoagulants & Antiplatelets

1. Relate the physiology of hemostasis with the mechanism of action of each drug class.
2. Describe the uses for each drug class.
3. Understand administration requirements for each drug class.
4. Discuss key evaluative techniques (assessment, labs, etc.) with respect to each drug class.
5. Review important precautions, contraindications and toxicology for each drug class.

### Each Part Includes:

- 2 hours of Continuing Education
- On-Demand access for at least a year
- Certificate of Completion
- PDF handouts to view or print

**\$75 for the series**
