ON-DEMAND WEBINAR

Adult ADHD

Dr. Gurdeep Parhar,
MD CCFP CCBOM CIME

Description:

A surprisingly high number of individuals with ADHD have other coexisting conditions. The overt symptoms of ADHD may overshadow these other conditions, but just as untreated ADHD can present challenges in everyday life, other conditions or disorders can also cause unnecessary suffering in those with ADHD if left untreated. The combination of ADHD with other disorders presents extra challenges for families and healthcare providers. Join Dr. Gurdeep Parhar in this follow-up to his previous excellent Adult ADHD webinar, where we'll discuss coexisting conditions, how to sharpen your detection of them, and pharmacological and non-pharmacological methods for treating ADHD with coexisting conditions.

Includes:

- 2 hours of Continuing Education
- On-Demand Access for at Least a Year
- Certificate of Completion
- PDF handouts to view or print

$39 + GST
