# Opioids Reconsidered:

*Mechanisms, Benefits, Risks,  
& Clinical Decision-Making*

## OBJECTIVES:

Anuj Aggarwal, M.D.

- 1 Describe the mechanisms by which opioids modulate pain, reward, stress, and physiologic function.
- 2 Differentiate the pharmacologic and clinical characteristics of commonly used opioid medications.
- 3 Apply contemporary concepts of opioid responsiveness to nociceptive, neuropathic, and nociplastic pain conditions.
- 4 Recognize the mechanisms and clinical implications of tolerance, opioid-induced hyperalgesia, and physical dependence.
- 5 Incorporate emerging evidence regarding partial agonists, including buprenorphine, into clinical decision-making.

## Includes:

- A certificate of completion,
- The live webinar event if registering prior to commencement,
- The on-demand recording to watch at your convenience,
- A handout in PDF format for viewing or self-printing
