Care of the Deteriorating Neuro and Nephro Patient

Jennifer Watson,
BSc, BN, CNeph (C)

Hayley Lane,
RN, BN, MN, CNN(C)

The Rapidly Deteriorating Neuro or Nephro Patient:

- The Patient with Structural vs Metabolic Causes of Deterioration
- The Patient with a Changing Neurological Exam
- The Inpatient Stroke or Neurosurgical Emergency
- The Inpatient with a Suspected Cervical Spine Injury
- The Seizing Patient
- The Patient with Neuromuscular Weakness or Respiratory Decline
- The Patient with Acute Kidney Injury
- The Patient with Electrolyte Abnormalities
- The Patient with Urologic Emergencies
- The Patient with Glomerulonephritis or Chronic Kidney Disease
- The Patient on Dialysis
- The Role of Acute Care Nurse in Code Blue and Rapid Response Calls

We'll help sharpen your Observations & Skills on all the above, by including:

- Key A & P review; Important patient history points
- Assessment: What you're looking for and why
- Interventions
- Priorities; Important Points; Pits and Pearls
- Integrating all these points during a rapid response or code blue call when you are the acute care nurse through case studies and examples

Includes:

- Coffee & Tea
- Lunch (Soup, Salad, & Sandwich Buffet)
- Printed Handouts
- Certificate of Completion for 6.5 Hours of CE

Save \$10 until October 27! Group discounts available!
